

Centralsense

Modern Catalogs

www.centrailsense.com

Centralsense has provided procurement software as a service (SaaS) since 2007.

Buyers on our platforms have purchased over \$1 billion of artwork, furniture and accessories.

In February 2022 Centralsense will launch a new B2B marketplace for hospitality, retirement community multi-family projects.

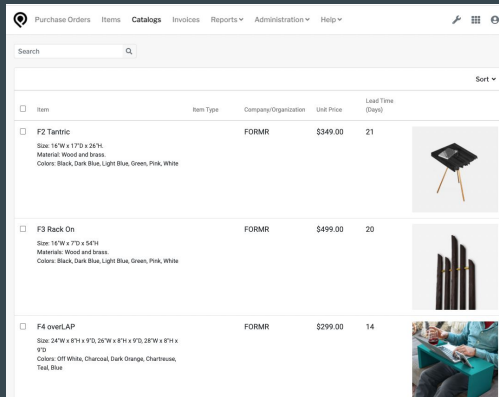

At no cost, sellers are given access to buyers and tools to simplify transactions.

Catalog and Quotation Tools

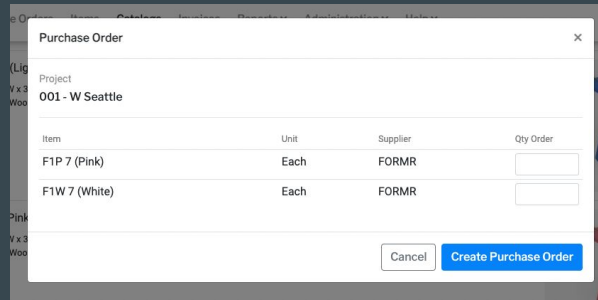

Easy to use tools make it far more efficient than updating pricing through spreadsheets and email.

Suppliers can provide quotes to multiple clients easily.

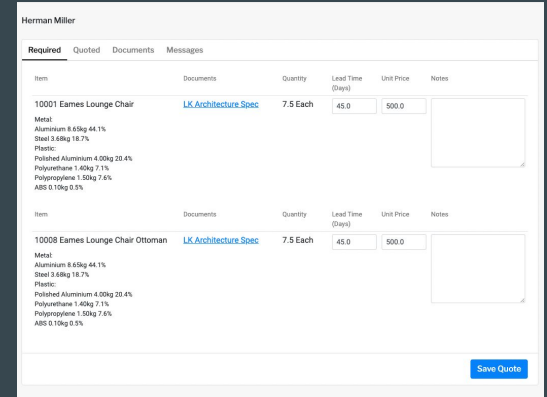

Procurement buyers
browse the catalog

They select item specifications
and create a draft PO

Or request a quote and provide
details for custom projects

Supplier Catalogs - Setup process

- Supplier agrees to host item information
- Our catalog team selects items from the supplier's existing website catalog
- Catalog team posts items to Modern PO
- Buyers are automatically notified of a new supplier or when new items are added

Furniture & Fixtures

Financing and shipping APIs simplify the manufacturing and delivery process.

Our procurement software has been used to procure over \$750 million of FF&E. Tools make it possible to efficiently approve shop drawings and specifications.

In addition, new financial APIs will allow select supplier to offer Net Terms while receiving payments immediately.

Accessories

Products including ceramics, glassware and textiles.

Our strategy for supplier diversity includes promotion of small business manufacturers looking to sell internationally.

With a combination of APIs and alternative funding sources, we provide new ways to finance manufacturing and gain logistical experience.

Artwork

Printed and digital media by original artists.

Our clients have purchased over \$20 million in artwork for hotel projects. Many projects seek to highlight the work of emerging artists.

With digital media we can leverage art printing APIs and manage printing, framing and delivery of artwork.

Terms and Conditions

- Centralsense Inc. (Host) will post one or more representative items from Seller. Post will contain information provided by Seller.
- Host will display information to procurement agents (Buyers) through a marketplace portal within a purchase order system, called Modern PO.
- Seller is responsible for notifying Host for changes in items or contact information.
- Host will not share Seller information to 3rd parties, with the exception of Buyers, without the expressed permission of Seller.
- Host assumes no liability for transactions between Buyer and Seller.
- Host can remove listings at any time.
- Seller can request to remove listing at any time via email at support@modernpo.com.
